| Special Precautions During COVID-19           | As Massachusetts has begun the process of reopening, the Department of Public Health has a [Safer-at-Home Advisory](https://www.mass.gov/info-details/safer-at-home-advisory) that urges people over the age of 65 to continue to stay at home except for essential errands.  

The [AARP is hosting regular Tele-Town Halls about how to protect yourself during the COVID-19 pandemic](https://www.aarp.org/health/conditions-diseases/coronavirus/info-2020/virtual-town-halls.html). Videos of past town halls and information about joining future events is posted on their webpage. Events are public and you do not have to be an AARP member to participate.  

The [CDC hosts a webpage specifically for older adults and people with disabilities](https://www.cdc.gov/coronavirus/2019-ncov/older-adults.html) on the risks associated with COVID-19, developing a care plan, and protecting one’s mental health. This brief [informational video](https://www.youtube.com/watch?v=1Z8ZaT8j-Ac) provides an excellent overview. The CDC also recommends creating a [household plan of action](https://www.cdc.gov/coronavirus/2019-ncov/yourself/household-plan.html) designed to protect the health of other family members if someone in your household gets sick.  

The [Diverse Elders Coalition](https://www.diverseelders.org/) has compiled culturally sensitive resources in multiple languages, including hotlines, daily living supports, hate crime response, and fraud prevention. The [National Asian Pacific Center on Aging](https://nacac.org/asianpacificcenter) also offers information on COVID-19 for older adults in eight languages. |
| Avoiding Social Isolation                      | State Senate President Karen Spilka and the MA Department of Mental Health launched the [“What If?” Campaign](https://www.ma.gov/what-if) to encourage people to reach out and check-in with friends and loved ones.  

Social connection is important to avoid loneliness during social distancing. The [Hummingbird Project provides activity ideas](https://www.hummingbirdproject.org/) to help you stay connected while staying at home.  

The [Massachusetts Councils on Aging](https://www.maconet.org) has compiled a list of virtual programs and entertainment including programming from the MA Library System, speaker series, and educational programs on arts/culture/travel, history, and zoos/animals.

| **Exercise and Staying Fit**    | **Agility Fitness** has a free Living Room Fitness video series to help older adults stay physically fit while at home.  
This [New York Times article](https://www.nytimes.com) also includes exercise tips and resources for older adults while staying at home. |
| **Nutrition Programs**          | The Massachusetts Council on Aging has put together [this page with updates on nutrition programs](https://www.massaging.org) throughout the state. |
| **Help with Telemedicine Visits** | Many providers are using phone or video services to provide care during the COVID-19.  
AARP has put together this [step-by-step guide to help prepare you for your first telemedicine visit](https://www.aarp.org).  
If you have questions about using telephone or video to start or continue therapy, William James INTERFACE has put together this helpful [Client Guide to Teletherapy](https://www.interface.org). |
| **Support for Veterans**        | The [U.S. Department of Veterans Affairs](https://www.veterans Affairs.gov) offers information to veterans about how to maintain and enhance mental health and wellbeing during the COVID-19 outbreak. |
| **Support for People with Dementia, Alzheimer’s, and their Caregivers** | The [Dementia Society of America](https://www.dementia.org) offers virtual memory cafes.  
The [Alzheimer’s Association](https://www.alz.org) offers virtual support groups and programs for individuals and their caregivers.  
The Alzheimer’s Association Helpline is also available 24/7 at 1-800-272-3900 to help anyone needing assistance during this difficult time.  
They have also put together [tips for caregivers of individuals with Alzheimer’s and other types of dementia](https://www.alz.org). |

## Resources to Locate Support

<table>

| **If You Have a Loved One in a Nursing Facility, Rest Home, or Assisted Living Residence** | The state has set up a **Nursing Home Family Resource Line** to provide information and answer questions about nursing home or rest home care during the COVID-19 outbreak. The resource line is available Monday – Friday 9:00 AM - 5:00 PM at **617-660-5399**.  
If you are considering moving a loved one from a nursing home or assisted living facility, this **fact sheet**, promoted by Massachusetts Councils on Aging and the Massachusetts Medical Society, may be very helpful. The **Life Care Advocates website** also provides guidance to help you and your family make this decision. |
| **Caregiver Help Desk**                                                  | The **Caregiver Action Network** provides tips and free help desk support to assist caregivers in navigating the complex challenges caused by the COVID-19 outbreak. The help desk is available Monday through Friday 8:00 AM-7:00 PM at **855-227-3640** or **online chat**. |
| **Massachusetts Family Caregiver Support Program**                      | The **Massachusetts Family Caregiver Support Program** is a great local resource providing free support to people caring for a loved one aged 60 or older or an individual living with dementia. The program is also available to adults aged 55 or older who are caring for a child younger than 18 or an individual with a disability. You can find out more by calling **1-844-422-6277** or **visiting the program’s website**. |
Nursing Facilities FAQ

How do I know if my or my loved one’s facility has any COVID-19 infections?

Guidelines from the Centers for Disease Control and Prevention (CDC) recommend that nursing facilities and senior care communities notify residents and their families of known COVID-19 cases at the facility, whether found in other residents or staff. The Department of Public Health (DPH) releases a Weekly COVID-19 Public Health Report, which includes on pages 24-31 a list of all the long-term care facilities in the state and the number of positive COVID-19 cases among residents and staff, as well as the number of deaths. On pages 79-83, this same data is provided for assisted living residences.

What protections should be in place if someone in my or my loved one’s facility is sick with COVID-19 symptoms?

EOHHS has issued a Nursing Facility Infection Control Competency Checklist. The checklist includes the following:

- All facilities should be separating residents who have confirmed or suspected cases from residents who are not infected. Residents who are ill should be kept separate from other residents, in a separate wing or unit if possible, and cared for in a single-person room.
- If a COVID-19 case has been found in the facility, all staff should be wearing appropriate PPE, such as masks, gowns, and gloves, when caring for residents.
- Residents should wear face masks whenever they are outside their rooms and whenever staff enters their rooms.
- All congregate or communal spaces should be closed and group activities involving individuals close together suspended.
- Communal dining should be suspended.
- Residents and their families should be informed daily of the number of COVID-19 cases identified among other residents and staff at the facility.

DPH conducted a series of clinical audits of nursing facilities and examined each facility’s compliance with the 28-point infection control checklist. The results of these audits can be found in the Weekly COVID-19 Public Health Report on pages 50-78, with facilities listed alphabetically. On July 19, 2020, DPH completed four rounds of clinical audits, with all nursing facilities subject to at least two audits, and by the end 94% of nursing facilities were found to be in adherence with the Infection Control Checklist.

Are there COVID-19 tests available to residents of nursing facilities?

At the end of April, the state required all nursing facilities to test all residents and staff, regardless of whether they had symptoms or exposure, as part of its emergency funding response effort and the surveillance testing guidelines. As long as there are positive cases in the nursing facility, the CDC guidelines recommend that every resident be tested every 3 to 7 days until there are no new cases found.

Currently, the CDC recommends that nursing facilities daily take the temperature of each resident and inquire about symptoms such as chills, cough, or shortness of breath. If a clinician determines that a resident has signs or symptoms of COVID-19, then that resident should be tested. A resident without symptoms should be tested if they have been exposed or had a suspected exposure. If a new case of COVID-19 is detected in any resident or staff, the nursing facility should perform testing on all residents of the facility. All long-term care facilities, including nursing homes, are responsible for arranging the testing they require. The state has provided an interactive testing map to assist nursing facilities in locating testing sites.
Can nursing facility residents receive visitors?

On July 20, 2020, DPH issued new guidelines regarding limitations on visitors in long-term care facilities. While nursing facilities are encouraged to help residents stay in touch with loved ones using electronic methods for communication (such as Skype and FaceTime), facilities may allow in-person visitation in designated outside spaces. Residents who are confirmed or suspected COVID-19 positive may not receive visitors.

Visitors must wear a mask or face covering for the entire visit and stay 6 feet apart from the residents. Residents must be accompanied by a trained staff member for the duration of the visit. For compassionate care situations, visitors are permitted inside the nursing facility, but must be restricted to a specific room with the resident. All visitors are subject to screening for COVID-19 symptoms.

Who do I contact if I am concerned about myself or my loved one and how the facility is handling COVID-19?

Residents of nursing facilities and assisted living residents have the right to access the DPH Ombudsman program, as well as to consult with their legal counsel. Families and residents can also call the DPH Nursing Home Family Resource Line at 617-660-5399, open from 9:00 AM to 5:00 PM, Monday - Friday.
